WORK EXPERIENCE

Full Stack Developer / Canadian Mortgages Inc. / September 2022 - Present

[Bitbucket](#), [Docker](#), [PHP](#), [MySQL](#), [Jira](#), [Confluence](#)

- LAMP development of proprietary monolithic PHP application for real estate mortgage borrowing and investment activity.

Multiple Positions / Bitbuy / November 2020 - August 2022

[GitHub](#), [JavaScript \(React, Gatsby\)](#), [SASS](#), [HTML](#), [CSS](#), [Amplify](#), [CloudFlare](#), [WordPress](#), [Drupal](#), [Webflow](#), [Sentry](#), [Browserstack](#), [Figma](#), [Cypress](#), [Jira](#), [Confluence](#)

I played a crucial part in rebuilding, enhancing, and maintaining Bitbuy's website and had the distinct honour of building and managing a talented team of web developers. Bitbuy is a Canadian-owned and operated cryptocurrency company and the first Canadian cryptocurrency trading platform to become regulated as a marketplace.

Manager, Application Team / June 2022 - July 2022

- I lead a team of 12 developers to accomplish tasks to enhance the company's website and mobile applications
- Assisted the merger of the online and mobile app teams into a single team (application team)
- Assisted with converting the online and mobile app teams from agile kanban to two-week sprints

Team Lead, Web Development / November 2021 - May 2022

- I lead a team of 6 web developers to accomplish tasks to enhance the company's website
- I assisted in developing the front end user interface and logic for Canada's first online cryptocurrency suitability standards
- I had the honour and pleasure of inspiring and motivating my team by fostering a welcoming, secure, and fun environment that promotes good communication, stimulates teamwork, and exhibits respect for one another's values and beliefs
- By coordinating their own career advancement with company goals through the use of monthly one-on-ones, the team was inspired to reach organisational targets (which we also used to identify gaps in process or raise improvements to technology)
- Utilised Jira and the agile kanban technique to manage the team's work intake for stakeholders in customer service, product, marketing, back end, and executive management

Senior Front-end Engineer / Bitbuy / November 2020 - October 2021

- Helped with the co-op student selection and interview process as well as the full-time recruitment for junior, intermediate, and senior front-end engineering roles
- Developed internal materials for the business's onboarding of front-end web developers
- Coached the development and use of Cypress automated testing

Business Owner / Code Summoner Corp. / April 2012 - January 2022

[Architecture](#), [Project Management](#), [Client Support](#), [PHP](#), [MySQL](#), [CodeIgniter](#), [WordPress](#), [Amazon S3](#), [Amazon EC2](#), [Amazon RDS](#), [Amazon Route 53](#), [SASS](#), [HTML](#), [CSS](#), [Foundation](#), [Bootstrap](#), [JavaScript \(jQuery\)](#), [Google APIs \(Maps, Places\)](#), [PhoneGap Build](#), [Documentation](#), [Adobe Photoshop](#), [Adobe Illustrator](#)

- End-to-end management of projects: from consultation and branding, documentation and architecture, to website

development and maintenance

- Contracts included: hybrid app development with PhoneGap Build, hosting management, custom WordPress theme and plugins, and various development projects for clients such as Flight Centre Ltd., Colour, and Deloitte

Senior Developer / Intuit - Quickbooks / July 2019 - October 2020

JavaScript (React, Gatsby), SASS, HTML, CSS, CircleCI, Netlify, Contentful, Adobe Experience Manager (AEM), Amazon Web Services, Parcel, ESLint

- Front end development (Gatsby and AEM) of marketing pages for <https://quickbooks.intuit.com/ca/>
- Responsible for building proofs of concepts such as: React Components from JSON, preview git branch deployment through CircleCI and AWS, boilerplate Gatsby + Contentful multilingual site, boilerplate Gatsby + AgilityCMS multilingual site, and reusable React UI components
- Responsible for crafting and evangelizing the team's coding guidelines
- Responsible for code reviews of GitHub pull requests by team members
- Main point of contact for team when manager is unavailable or away
- Providing input to the technology, CI/CD pipeline, project management and account teams to define deliverables and timelines (agile, sprints)
- Experimenting with and evaluating new technologies and design systems

Full Stack Web Developer / AIR MILES / August 2015 - June 2019

JavaScript (AngularJS, React, Gulp, jQuery), SASS, HTML, CSS, PHP, MySQL

- LAMP development of turn-key promotional web solutions for AIR MILES customers (thousands of concurrent users)
- Designed and built code for randomized prize generation and allotment (hundreds of thousands), URL shortener service, CURL service with health & up-time dashboard
- Styling React components for the AIR MILES Pattern Library (official design system)
- Designed and built solutions to improve efficiencies in project setup and deployment (README, Bash, Gulp)

Front End Web Developer / MediResource Inc. / April 2014 - December 2014

JavaScript (AngularJS, Grunt, jQuery) SASS, Bootstrap, HTML, CSS

- Responsive UI development with Bootstrap and SASS
- Grunt and Angular collaboration with other front end developers
- Style guide automation and architecture for large healthcare platform
- Advocate for best practices, OOCSS, and responsive design

Senior Full Stack Web Developer / 52 Pick-Up Inc. / August 2013 - February 2014

Architecture, Project Management, Client Support, PHP, MySQL, WordPress, Amazon S3, Amazon EC2, Amazon RDS, Amazon Route 53, Amazon CloudFront, HTML, CSS, Foundation, SASS, JavaScript (jQuery), Google APIs (Maps, Places), Documentation, Responsive Design, Adobe Photoshop, Adobe Illustrator

- Full-time position to help bring experience to a young and growing interactive team
- Built, tested, and maintained responsive B2C websites
- Assisted and advised with hiring of new interactive team members
- Introduced scrums to help stay organized and on priority within a fast-paced environment
- Introduced security standards to help keep IP data more secure

Multiple Positions / Flight Centre Ltd. / February 2009 - March 2012

Architecture, Project Management, Documentation, Amazon EC2, Amazon RDS, PHP, MySQL, Facebook API, Facebook Developer Platform, HTML, CSS, JavaScript (jQuery), Google APIs (Maps, Analytics)

Global Social Media Technologist (full stack developer) / April 2011 - March 2012

- Created a custom CMS for Facebook and micro-site contests
- Directed technical solutions involved with Flight Centre's brand new global social media strategy
- Managed over 120 projects over the course of the year
- Interviewed and trained candidates for web development
- Conceptualized, developed, and maintained a WordPress multi-site system
- Authored process documentation from end-to-end solutions such as blogs, Facebook contests, and micro-site contests
- Collaborated and liaised with third-party vendors

Front End Web Developer / April 2010 - March 2011

- Moved to Australia by invitation of global e-commerce leader (recognized for strong work ethic)
- Worked with an enterprise front end development team on large websites (e.g. flightcentre.com.au),

studentflights.com.au) with millions of monthly user visits

Full Stack Web Developer / February 2009 - March 2010

- Created an internal system for retail consultants to allow clients to agree to terms and conditions for booked travel online (processed over 500,000 customers in its first year)
- Helped develop the next version of flightcentre.ca, converted Photoshop designs to XHTML, developed website contests which allowed users to post their photos or videos to enter to win prizes and vote, and developed the flightcentre.ca WordPress blog.

Volunteer Full Stack Web Developer / Project Peru / March 2008 - September 2011

PHP, MySQL, HTML, CSS, WordPress, Adobe Flash, Adobe Photoshop, Fund Raising, Videography

- Consulted for NSCAD students on web development practices and technology solutions
- Collaborated on Adobe Flash development of projectperu.ca
- Assisted with fundraising activities (posting flyers, painting a house, acquired weekly meeting space)
- Selected and researched equipment for recorded video in remote locations of Peru (approximately 30 hours of footage)
- Developed the first version of threadsofperu.com
- Assisted in the research, setup, and creation of the first version of the Threads of Peru eBay store
- Consulted with a third-party tourism company on web development practices and technology solutions
- Participated in fundraising \$20,000 in 5 months
- Participated in cutting-edge international development design
- Collaborated on print and social media marketing of the project
- Hands-on interaction and study with foreign language communities in Peru

Senior Full Stack Web Developer / EZD Consulting Inc. / October 2001 - August 2008

Architecture, Client Support, PHP, MySQL, HTML, CSS, JavaScript, Adobe Flash, ActionScript, Adobe Photoshop

- Developed turn-key solutions to deploy directory web sites within hours and a proprietary CMS
- Developed websites ranging from small business solutions to community websites receiving +10,000 unique hits a month
- MySQL optimization/design for user information, email lists, billing info, addresses, and website performance/statistics
- Involved with hiring and training new developers
